

NAJMUN NAHER

Junior Software Developer | .NET & Web Technologies

Azimpur, Dhaka 1205 | Permanent: Niamati, Bakerganj, Barishal
01723471104 | 01575853357

naz.moon1998@gmail.com | github.com/NajmunNaharSarika

CAREER OBJECTIVE

A motivated and detail-oriented software developer seeking a challenging position in a reputable organization where a collaborative environment and decision-making opportunities will allow me to contribute effectively, while continuously advancing my professional growth in the field of software engineering.

EDUCATION

BSc in Computer Science & Engineering

Bangladesh University of Business and Technology (BUBT)

CGPA: 3.19 / 4.00 | Passed: 2026

Diploma in Engineering (Computer Technology)

National Institute of Engineering & Technology

CGPA: 3.77 / 4.00 | Passed: 2022

Secondary School Certificate (SSC)

Niamati Adersha High School, Barishal Board

GPA: 3.61 / 5.00 | Passed: 2015

PERSONAL INFORMATION

Father's Name: Md. Khalek Sikder

Mother's Name: Nur Najnin Khanam

Date of Birth: 07 November 1998

Gender: Female

Nationality: Bangladeshi

Religion: Islam

Marital Status: Unmarried

Blood Group: B+

Languages: Bangla (Native), English (Fluent)

TRAINING & CERTIFICATIONS

Web Application Development Using ASP.NET

IsDB-BISEW IT Scholarship Programme

- Design & Implement Databases with MS SQL Server 2016 EE
- Programming with C# 10 and .NET 6
- Programming in HTML5 with JavaScript & CSS3
- Developing ASP.NET MVC 5 Web Applications & APIs
- Developing ASP.NET Core Web Applications & APIs
- Advanced Web Application Development with Angular

Web Development Internship

Creative IT Institute | Duration: 3 Months

TECHNICAL SKILLS

Languages

C# 10 / .NET 6

JavaScript

TypeScript

HTML5 / CSS3

Frameworks

ASP.NET MVC 5	ASP.NET Core	Angular 16	Entity Framework
---------------	--------------	------------	------------------

Database & Patterns

MS SQL Server	T-SQL / Stored Proc.	Repository Pattern	Clean Architecture
---------------	----------------------	--------------------	--------------------

Tools & Other

Visual Studio 2022	VS Code	Git & GitHub	MS Office Suite
--------------------	---------	--------------	-----------------

AI Tools

Claude Code	Cursor	Antigravity	ChatGPT
-------------	--------	-------------	---------

PROJECTS

1. Edu Track (Assignment Management System)

Role-based Assignment & Submission Management System for a school or college. The system should allow teachers to create assignments for specific classes or courses, students to view and submit assignments, and teachers to review submissions and provide marks and feedback.

GitHub: github.com/NajmunNaharSarika/EduTrack

2. Event Management System Using ASP.NET Core

A full-featured ASP.NET Core MVC web application for managing clients and events — built under the Aurum Events & Co. brand. The system supports client registration with image upload, event assignment, role-based access control, and an elegant card-based UI.

GitHub: github.com/NajmunNaharSarika/EventManagerCore

3. ASP.NET MVC 5 Event Management System

Web application for managing clients and event bookings. Features login-based access control — public visitors can browse events and clients, while create/edit/delete operations require authentication.

GitHub: github.com/NajmunNaharSarika/ASP.NET-MVC-5

4. OOP & Generics in C#

A ASP.NET console application demonstrating core OOP principles — inheritance, abstraction, interfaces, generics, and polymorphism — applied to a real-world vehicle classification system.

GitHub: github.com/NajmunNaharSarika/OOP-Generics-in-C

5. HTML & CSS Interactive Learning Book

A self-contained, multi-chapter interactive learning resource for HTML and CSS — built entirely with HTML, CSS, and Font Awesome icons. Designed as a personal study reference and portfolio project.

GitHub: github.com/NajmunNaharSarika/HTML-CSS-Interactive-Learning-Book/tree/main

6. Node.js E-Commerce Web Application

A full-featured e-commerce web app built with Node.js, Express, MongoDB, and Socket.io — featuring real-time product updates, shopping cart, order management, and an admin dashboard.

GitHub: github.com/NajmunNaharSarika/Node.js-E-Commerce-Web-App

7. Hospital Management System — Generic Repository Pattern (C#)

A C# .NET console application demonstrating the Generic Repository Pattern applied to a hospital domain — managing Doctors and Patients through a clean, reusable architecture.

GitHub: github.com/NajmunNaharSarika/-Hospital-Management-System-Generic-Repository-Pattern-C

8. Collection list & LINQ join Example

This project implements a simple product management system using LINQ (Language Integrated Query) to demonstrate data querying and joining operations across three related entities: Products, Product Categories, and Product Models.

GitHub: github.com/NajmunNaharSarika/Collection-list-LINQ-join-Example

9. Smart Restaurant Ordering Management System (SROMS)

A relational database-driven system built with MS SQL Server to automate restaurant operations — covering table management, menu categorization, order processing, and payment tracking.

GitHub: github.com/NajmunNaharSarika/Smart-Restaurant-Ordering-Management-System-SROMS
